# IMPROVING THE CYBER RESILIENCE OF BUSINESSES *IN ENGLAND AND WALES*

There is a **police-led**, not for profit Cyber Resilience Centre in every region to help businesses better protect themselves against cyber threats.

[www.nationalcrcgroup.co.uk](http://www.nationalcrcgroup.co.uk)

# WHY SHOULD BUSINESSES SIGN UP?

Each CRC offers flexible membership packages to suit the needs of all businesses with Core Membership being free of charge.

As a CRC member, you will also receive:

## WELCOME PACK

An easily digestible welcome pack to help you understand how the **CRC** can work with your business to develop its resilience to cyber-attacks.

## TIPS & TRICKS

A monthly newsletter full of tips and tricks to help you navigate cyber security basics.

## RESOURCES

Access to regular downloadable resources and guidance from law enforcement, the National Cyber Security Centre and other partners.

## SKILLED

We provide a range of services delivered by top talent from local universities, including security awareness training for employees.

## TRUSTED

Comprehensive access to IASME accredited partners who can help you complete the Government-backed Cyber Essentials programme – designed to protect businesses from the majority of the most common cyber attacks.

## BOOST YOUR CYBER RESILIENCE

The CRCs work with students from the majority of NCSC certified universities nurturing the brightest and best cyber talent to develop a student talent pipeline. The students are mentored and supported to engage with businesses delivering affordable cyber security services, from Security Awareness Training to Vulnerability Assessments. The objectives are to build a talent pipeline and direct this back into policing for the benefit of law enforcement and business. This ensures students will be career ready with strong cyber security skill sets in business and policing.

# TESTIMONIALS AND REVIEWS

We deliver our services using an innovative talent pipeline programme, where the country's leading universities in cyber skills partner with local policing and the private sector, providing commercial training and oversight for students to deliver this work. The students are from universities within each centre's local region, and work under the guidance of acknowledged, and experienced national cyber specialists, delivering each service using industry standard tools and techniques.

Far cheaper than we expected to pay -  
far better than we expected to receive.

”

“

You uncovered way more issues than our  
automated vulnerability management  
program we've used for years.

A charity based in the South East recently requested  
the Security Awareness Training for their organisation.  
Following the session, the following feedback was given:

“

Just a short note to say a massive thank you...

following a great training session to our staff this week. I have to say, mostly they find IT  
deadly boring and probably groaned when they saw my email to book into the training  
session! However, we got some really positive feedback and they all stayed engaged  
right to the end.

I definitely think they all went away feeling much more in control and better placed to  
identify security risks, for the work and their personal IT security at home – which is really  
important now that more of them are working remotely too.

Normally training is dull, and not impactive, the sessions  
were exciting, interactive, and after, people said it's the  
best training they've done in years.

”

“

You highlighted issues we  
hadn't even considered.
